Did I forget to mention that our first BOF session is already posted?????

Apparently I did! My bad!

Our first BOF is:

[CFWheels - Finally, a framework for the rest of us](#)

A discussion on ColdFusion on Wheels and how it provides fast application development, a great organization system for your code, and is just plain fun to use. From Convention over Configuration to an ORM that can be used with ColdFusion 8 and Railo, join Chris Peters, Mike Heinke and Chaz Chumley as they answer your questions and demonstrate some great sites builds on CFWheels.

This BOF will be on **Thursday, July 29th at 7:00 pm**. Make sure to schedule this BOF if you're interested!!

Also, for all you CFWheels junkies, there are two sessions with CF on Wheels!

[ColdFusion on Wheels - Convention over Configuration](#) - (Mike Henke) -
Thursday, July 29 from 1:30 PM to 2:30 PM

[Object Relational Mapping in CF on Wheels](#) - (Chris Peters) - *Thursday, July 29 from 5:30 PM to 6:30 PM*

Happy scheduling!
